M3 SPEED CARE SERVICE

(abbreviations "M.S.C.")

The M3 ensures continuous and stable performance of the product at the customer's site of use through the M3 M.S.C.

M.S.C. is a service that covers the warranty period. M.S.C. is a powerful support service that protects your product from a variety of damage, including professional repair as well as technical and software support. When purchasing M.C.S., you can receive a quick repair period through a separate service option.

Regardless of the residence site, M3's global support infrastructure ensures rapid repair and technical support onsite and online. You can also use the online RMA portal to manage your products and contact your M3 local technical staff or our IT & CS team directly.

With quick support and rapid service, M.S.C. is M3's integrated support service that minimizes our customers' downtime and offers satisfiable trouble shooting and maintenance.

Extend Service of Service period

Since the purchase of our products, **the basic warranty period of a year (Terminal) and 6 months (Accessory)** is guaranteed.

A Basic warranty period begins when the product is delivered to the end user, and for resellers, if it is possible to prove when it is delivered to the end user, that's when it starts with a Basic warranty. So, the basic warranty period starts based on arrival at end users' sites.

The M3 also offers the option of warranty extension. If customers want to use our products reasonably and eco-friendly for a long time to protect their goods, we confidently recommend the M3's service extension option.

In addition to the basic warranty period, M3 has additional **3 years or 5 years of extended service** options, and M3 sales representatives must be informed of the intention to purchase these services, **within 45 days after the basic warranty period begins**.

In addition, if a customer, who has purchased a 3- or 5-year Warranty Service, wants the longer support, they should inform the M3 salesperson of **intention to purchase the Extended Warranty Service before it expires**. After that, the M3 sales representative will quickly inform the customer of the possibility of extension.

Quick and easy repair process

When customers need convenient, fast repair anytime or anywhere, please visit <https://www.m3-service.net/> to create an account. Once your registration is approved, register the product to be repaired, print the service request form, and send it to the M3 Germany Service Center (for customers in Germany and nearby regions). Customers in other regions should contact their nearest M3 Service Center to proceed with the repair. A qualified M3 engineer will repair the product and return it to you as quickly as possible.

Individually customized support structure

With M3 Mobile, customers will receive answers and relevant information from certified regional service centers and technical support teams at the same time. We are always committed to enhancement of our customers' experiences and satisfaction with our professional care and by offering a wide range of warranty options as well as competitive repair prices for various problems.

Type of M.S.C. Services

- Battery 1 year warranty
- Support for repair of accidentally broken or defected terminals
- Contract Required
- **Total Damage (3 or more than 3 of 6 main parts damaged) cannot be compensated or repaired.**

Warranty Policy

Definition of Product Warranty Coverage and Warranty Period

The product warranty period refers to the duration during which the manufacturer or product seller provides free repairs for performance and functionality defects that occur naturally in a normal environment.

Through a service package, users have the option to extend the warranty period to 3 years or 5 years.

The product's warranty period is calculated based on the purchase date, and the purchase date is verified through the product warranty certificate or purchase receipt. However, in the absence of the warranty certificate and purchase receipt, the company determines the warranty conditions based on the warranty information issued by the company at the time of production of the respective product. In this case, the purchase date is calculated by adding 3 months (the typical distribution period) to the production year and month.

Free Repairs

Performance and functional failures occurring under normal usage conditions will be repaired free of charge within the product warranty period (basic or service package period).

If an authorized CS engineer repairs the product free of charge or for a fee during the basic warranty period (1 year for terminals/batteries & accessories for 6 months) or the service package period, and the same malfunction occurs within 3 months under normal usage conditions, the corresponding component will be replaced free of charge. (Even if the occurrence of the same malfunction is after the warranty period has expired, free repair will be applied only for the same component within 3 months.)

In the case of purchasing a service package, free repairs will be carried out within the service package period for damages caused by user negligence, excluding total damage.

Paid Repairs

- Products beyond the service package and warranty period.
- Inspection, software adjustments, and updates for products beyond the service package and warranty period.
- Removal of dust, cleaning, and removal of foreign objects inside the product.
- Failures resulting from not adhering to the precautions stated in the user manual.
- Failures due to usage exceeding the specified electrical capacity.
- Failures caused by unauthorized consumables or optional items not approved by the manufacturer.
- Failures resulting from repairs by someone other than a CS engineer from the manufacturer's authorized service center. *Repair itself may be refused depending on the product. (Refer to the product warranty certificate.)
- Experiencing failures or damage due to external impacts, drops, etc., if a service package is not purchased.
- Failures due to acts of nature (lightning, fire, earthquake, natural disasters, flooding, etc.).
- When the lifespan of consumable parts, such as batteries, has ended.

Out-of-Warranty Policy

Even after the expiration of the service package and warranty period, M3 products can still undergo repairs at the service center. However, charges will be applied for repairs due to warranty expiration.

- User-induced product damage.
- In the case of performance degradation due to excessive dust/pollution
- Scratches and damage to the display.
- Damaged/cracked/deformed displays, touch panels, main bodies, PC boards, or triggers.
- Damage/cracks to internal/external plastic components.
- Damaged or missing parts.
- Minor defects such as scratches/dents.
- Water damage.

Damage to accessories is not supported for out-of-warranty repairs.

Definition of Total Damage

Total Damage

Total Damage, even if you have subscribed to the service package for 3 years or 5 years, is **not eligible for repair.**

Total Damage is defined as a condition in which 3 or more of the 6 main parts of the terminal are damaged. Six main parts: **body, motherboard, display, scanner, camera, front physical buttons**

- Example) Display, motherboard damage – **Not Total Damage** – repairable
- Example) Display, front physical buttons, body damage – **Total Damage** – not repairable
- Example) Display, motherboard, scanner, camera damage – **Total Damage** – not repairable

Precautions in case the terminal is exposed to liquids

If a water-resistant product has been exposed to water or liquid, please follow the instructions below:

- Wipe the product thoroughly with a soft and clean cloth to completely dry it.
- Do not connect the charger or accessories until the product is completely dry. Connecting the charger with damp external ports may damage the product.

Avoid using heating devices (e.g., hairdryers) when drying the moisture, and refrain from cleaning the product with soap, detergent, abrasive materials, chemicals, compressed air, ultrasound, or external heat sources. Failure to follow these precautions may lead to discoloration, corrosion, or other damage.

Check Warranty Status

The warranty period can be checked on the website.

The information can be checked by entering ID, password, and S/N of the device on the website.
(The terminal S/N is written on the inside of the battery mounting location)

How to check

1. Ask ID (e-mail) and Password to our CS Team(cs@m3mobile.co.kr) for login.
2. Log in with the received information on the website <http://cs.m3mobile.net/member/login>.
3. After login the warranty status will be shown after entering the S/N of the purchased product.

Red color means the warranty has expired.

Green color means under warranty.

Or you can easily check it by creating an account at <https://www.m3-service.net/>.

DOA

Every M3 terminal and accessory must pass all necessary tests prior to shipment, but shock or mis-handling during delivery can cause unexpected work behavior as it should not be.

In such cases, „DOA“ will be called, compensation and replacement will be followed in accordance with the procedure.

Condition

1. Terminal & Accessories will be recognized as DOA by notifying the M3 representative after finding the problem **within 2 months of receipt**.
2. M3 supports all repair and exchange shipping costs.

How to Support

1. Replacement

After sending the DOA terminal to the M3 Headquarter Service Center in Korea or M3 GmbH in Germany, the person in charge checks the symptoms and sends the new terminal to the customer.

2. Product repair support

The authorized service centers of M3 around the world check for defective terminals and accessories, repair them, and resend them to customers.
